

NY Green Bank: Financing an Energy Efficient Future

NY Green Bank is a State-sponsored investment fund managed by a team of solutions-oriented financing professionals. As a market-focused and market-responsive entity, NY Green Bank specializes in implementing effective approaches for financing projects that support New York State's clean energy goals. NY Green Bank makes financing available to project developers, building owners, property managers, energy service companies, and other sustainable infrastructure market participants for economically and technically viable projects and businesses, especially where financing from traditional capital providers is not available. Financing these projects will help accelerate the deployment of clean energy across our State and drive the evolution of the grid and energy infrastructure to be more flexible and resilient.

New York State is on a path to reduce greenhouse gas emissions, decrease consumer energy costs, and create job opportunities. Accelerating the deployment of energy efficiency is a cornerstone of this ambitious initiative. The State's energy efficiency target will deliver nearly one-third of the greenhouse gas emissions reductions needed to meet its goal of 40% reduction by 2030.

Energy efficiency funding is available for qualifying projects, including but not limited to:

- Commercial, Multifamily, and Industrial Building Owners and Property Managers seeking to make their facilities more energy efficient
- Engaging tenants on financing mechanisms for efficiency upgrades
- Project developers seeking to offer and/or expand access to energy efficiency loans for homeowners
- Longer-term financing for commercial or non-profit entities seeking to engage in energy efficiency projects
- Advancing energy equipment financing for Energy Service Companies (ESCOs) via lease tenor extensions
